# MADHULATHA KONKA

## MERN Full Stack Developer

Anantapur, Andhra Pradesh | +91 6309194613 | Madhuu0725@gmail.com | github.com/madhuu0725-png

## PROFESSIONAL SUMMARY

Results-driven MERN Full Stack Developer (B.Tech ECE, CGPA 8.1) with proven ability to design, build, and deploy responsive, full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Proficient in REST API design, JSON data handling, and SQL-based data management. Certified in Python Full Stack Development and Responsive Web Design; recognized for writing clean, maintainable code and rapidly mastering new frameworks. Eager to bring strong full-stack fundamentals and a fast learning curve to a growth-focused engineering team.

## TECHNICAL SKILLS

- **MERN Stack:** JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB
- **Frontend:** HTML5, CSS3, Bootstrap, Responsive Web Design, MVC Architecture
- **Backend & APIs:** REST API Design & Integration, JSON Data Handling, Node.js, Express.js
- **Database:** MongoDB, SQL, Database Queries & Data Management
- **Programming:** Python, JavaScript, Object-Oriented Programming (OOP)
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab
- **AI-Assisted Development:** Claude, ChatGPT, Cursor, Gemini, Perplexity, Antigravity IDE

## TECHNICAL PROJECTS

### Kapture AI – Maya | AI-Powered Voice Assistant

*Personal Project | HTML, CSS, JavaScript, Python, CRM Webhooks*

- **Built a full-stack AI voice assistant** for automated payment and loan-collection calls, with identity verification before disclosing sensitive account data.
- **Engineered conversational workflows** to discuss outstanding payments, negotiate repayment options, and log Promise-to-Pay (PTP) commitments in real time.
- **Integrated multi-channel communication** via SMS/WhatsApp payment links and live-agent escalation for unresolved cases.
- **Built CRM integration and testing tools** (call simulator, state-machine monitor, webhook logging, Python mock backend) to validate workflows pre-deployment.

### 32-Bit FPGA-Based ALU Using Reversible Logic

*Academic Project | FPGA, Digital Logic Design, Simulation & Testing*

- **Designed a 32-bit Arithmetic Logic Unit** using FPGA-based digital design and reversible logic gates, improving power efficiency, area, and speed; verified through simulation and functional testing.

## CERTIFICATIONS

- Python Full Stack Development – Frontend, Backend, Database & Web Apps, EduSkills
- Static & Responsive Web Design – Mobile-Friendly Interfaces, NxtWave
- SQL – Database Queries & Data Management, NxtWave
- Programming Foundations with Python, NxtWave

## INTERNSHIPS

- **Data Analytics & AI Agents Virtual Internship – TCS** | July 2026
- **Data Analytics Virtual Internship – Deloitte** | July 2026

## EDUCATION

- **B.Tech, Electronics & Communication Engineering —** AnanthaLakshmi Institute of Technology & Science, Anantapur | CGPA 8.1 | 2026
- **Diploma, Electronics & Communication Engineering —** Government Polytechnic College, Tadipatri | CGPA 8.13 | 2023
- **Languages:** English (Proficient), Telugu (Native)
